Your AI and Automation Launchpad

NEPI®
Automate Anything

A Software Toolkit for Edge AI and Automation Solutions

numurus
Numurus offers NEPI deployment, prototyping, and customization design services to reduce project risks and timelines. Numurus’ professional services team includes AI, robotic, and smart sensing specialized engineers that accelerate NEPI-enabled solution implementation efforts.

Numurus partners with several leading GPU and AI processor providers to offer its line of S2X smart system platforms, each pre-installed with Numurus’ NEPI Engine software toolkit, giving developers a rapid turnkey solution for adding AI and automation to any robotic or edge-AI project.

NEPI-Enabled hardware provides developers a rapid solution for kicking off any AI and automation project.

Numurus offers NEPI deployment, prototyping, and customization design services to reduce project risks and timelines. Numurus’ professional services team includes AI, robotic, and smart sensing specialized engineers that accelerate NEPI-enabled solution implementation efforts.

NEPI-Professional Services can help you reach your product goals faster.

**NEPI Engine Software**

NEPI Engine, an open-source Linux toolkit for AI and automation solutions, allows engineering teams to focus on the end customer solution by offloading low-level middleware development.

**NEPI-Enabled Hardware**

NEPI-Engine Software

Customizable User Interfaces

AI and Automation Applications

2D and 3D Data Management

Plug and Play Drivers

AI and Automation Applications

2D and 3D Data Management

Plug and Play Drivers

RO and Other APIs

ROS and Other APIs

NEPI-Engine lets engineering teams focus on the end-customer solution, not low-level software development.
NEPI enables solution providers to bring smart products to the market faster.

“Both the NEPI software and Numurus team have gone above and beyond our expectations, and we are thrilled to have them as a partner as we look to apply NEPI across all of our products.”
